Re: Partnership

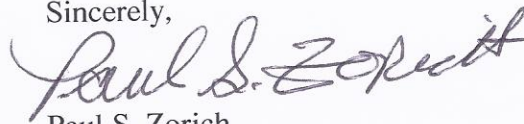

Dear Kate:

The Warm Springs PSD recognizes the importance of a healthy Warm Springs Run. Over thirty years ago the PSD constructed a wastewater collection and treatment system to serve the Berkeley Springs area. Prior to this, a network of private sewer lines emptied directly into the Run just north of the Town. With a major plant upgrade in 2008, the PSD consistently returns to the Run water which is oftentimes better than the water already in the stream.

We believe a multi-agency approach to the stewardship of the Run can restore, protect and preserve this resource that is so important to the environmental and financial health of the community. Therefore, the Warm Springs PSD is proud to endorse and join in a general partnership with the Warm Springs Watershed Association. As general partners, we understand that the PSD will be included as such on the Association's web site.

We look forward to working with the Warm Springs Watershed Association and the other partners as we continue the work to safeguard the Run.

Sincerely,

Paul S. Zorich  
Chairman
